

Tornado Body Dryer

Body Dryers in Tanning Salons

On the left is a Pennsylvania-based salon that was named "Top Salon" by InStyle Magazine. They initially purchased 2 dryers, and then purchased 2 more when they expanded their business. They believe the Body Dryers demonstrate to their customers that they are on the cutting edge and utilize the latest and best in equipment and tanning techniques. On the right, a salon in Seattle painted the air tube black and "hid" the pod to better fit with their overall *Avant Garde* look.

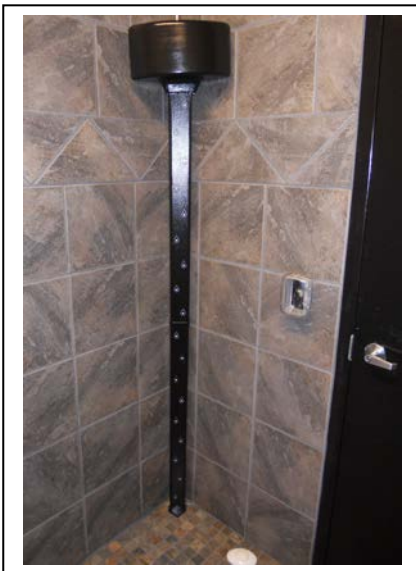

Treat Your Customers to the Ultimate After-Tan Luxury
